

Shoreline School District

The Shoreline School District is in a residential community north of Seattle and includes the cities of Shoreline and Lake Forest Park. All of Shoreline's 10,000 students attend school in newly-renovated buildings. In addition, Shoreline is a recognized leader at state and national levels in enhancing instruction through the application of technology.

Shoreline uses CommuniGate Pro on MacOS X to host email for 1600 faculty and staff members. Their end user base is about 98% Outlook Express on Mac desktops.

According to David Watson in the IT department, Shoreline migrated from CommuniGate Pro from Eudora Internet Mailserver – which, he says, was crashing almost daily.

They chose CommuniGate Pro because it is standards based, and they like the built-in Webmail. They also plan to utilize the new calendaring features in v4.1.
