

One number, any line

Give your customers HD Voice with one number to use on any network, anytime, anywhere

Enable your customers to make crystal clear HD Voice phone calls from their own personal number, whether they are on your network or not, at home, in the office or even roaming.

A personal phone number that is place and network independent

CommuniGate 1Number gives your subscribers one phone number that they can use for all their calls. Whether at home using a PC or Mac, in the office using a desk phone or roaming using a smartphone your subscribers can make and receive HD quality calls using one personal number that you provide.

Your brand, your service, any network

1Number includes white-label HD Voice applications which enable your subscribers to use your branded voice services on any internet connected device.

Zero install anywhere availability

1Number requires virtually no consumer software installation and enables your subscribers to be contacted wherever they are and on any network, whether it is yours or not.

Hear the difference

HD Voice differentiates 1Number from all the other VoIP and cloud telephony applications in the market. HD Voice delivers unbelievable clarity and audio fidelity, in addition to high quality, reliable connections over even sub-optimal networks, like WiFi hotspots or 3G data networks.

Jane's personal number 1 CommuniGate Number

HDVOICE Benefits

- ✓ Crystal clear call quality
 - Hear what is really being said
- ✓ Significantly reduced jitter and packet loss
 - Consistent and reliable conversation quality
- ✓ Dynamic codec optimization
 - Works even in sub-optimal environments, e.g. public hotspots

Maximize the billing relationship to generate incremental revenues

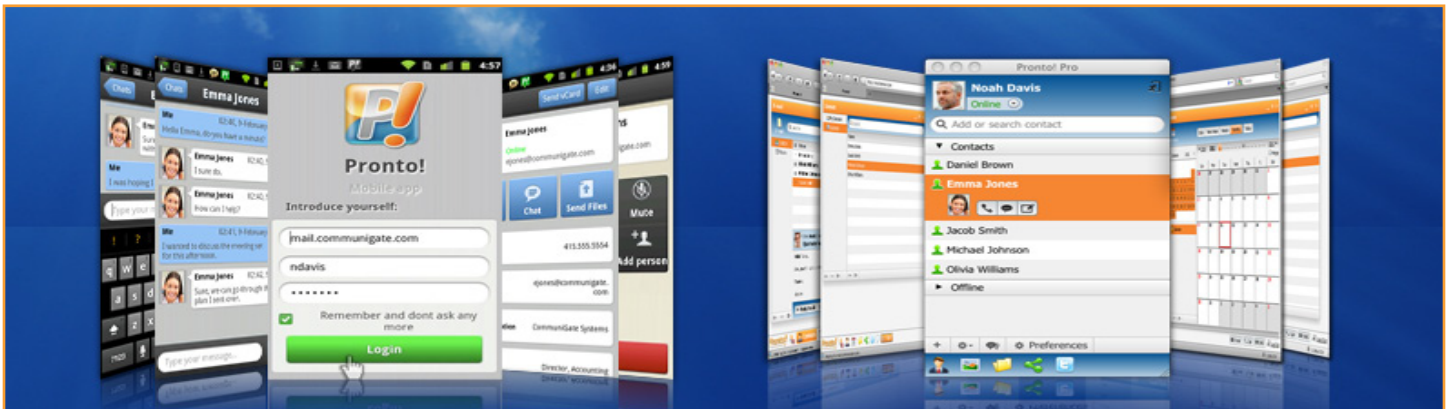

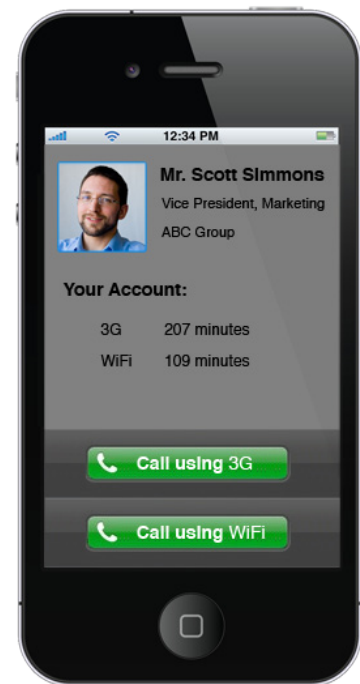

Powered by CommuniGate Systems, and integrated with the carrier's billing systems, 1Number enables delivery of new value added High Definition voice services to their customers across any network.

Integrated billing

Provide on-net and roaming VoIP minutes over any network as part of your calling plans, displaying account information to the user in the application.

Increase roaming usage

Easy to use web and mobile applications ensure your subscribers can make calls using their 1Number even when roaming, providing them with a high quality, reliable and convenient alternative to other providers.

Pronto!
