

Exceptional Multi-Tenant Unified Communications

UC CENTREX

Unified Communications is going through rapid growth, especially in the micro and small business (SMB) markets. Many Unified Communication solutions on the market today claim to be both complete, and SMB friendly. In fact, most are not. Often they both, lack key features, and come with prohibitive hardware and software licensing structures that can make the business models impossible for the service provider and business.

UC Centrex is different

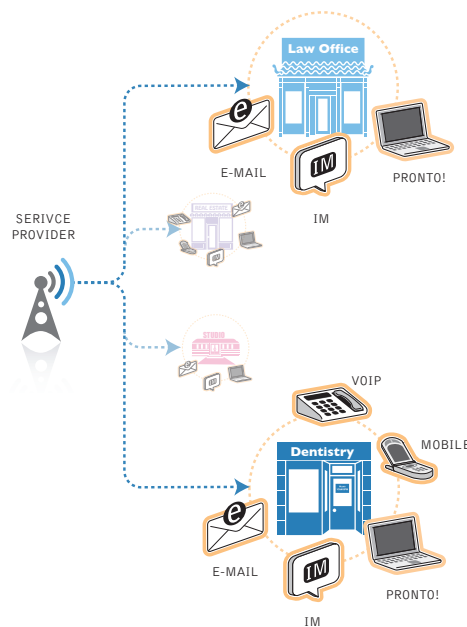

UC Centrex is a **complete** Unified Communications solution, specifically designed to allow service providers to deliver **competitive**, yet **profitable** offerings to the micro and small business.

UC Centrex delivers the industry's most powerful and complete Unified Communications solution with world-record holding scalability. An IMS compatible, high-density, multi-tenancy platform with click-to-install simplicity, UC Centrex delivers exceptional performance with an unbelievably lean hardware requirement.

The UC Centrex Offering: Simple, Powerful, Profitable, Complete

A complete Unified Communications platform designed for SaaS delivery to the small business

- Exceptional scalability and performance to support millions of end users on minimal hardware
- Comprehensive administration and operation tools to manage hundreds of thousands of individual domains
- Complete messaging support including e-mail, instant messaging (IM), voice mail and video
- Powerful IP PBX to support all business telephony requirements, including a soft-switch session border controller
- IMS and SIP compatible, including IMS backplane
- High Definition (HD) Voice for exceptional voice clarity
- File sharing and document storage from both the desktop and the mobile
- Shared calendars, contact backup, groupware
- Mobile synchronization for email, calendars, contacts, files and more

Benefits for the Service Provider:

- **In-demand services:** Demand for Unified Communications is in rapid growth
- **High value propositions:** Customers associate significant value to their business
- **Cost-effective solutions:** High-density, multi-tenancy solution architecture maximizes return on investment(ROI) and minimizes total cost of ownership (TCO)
- **Reduced operational costs:** Simplified, Cloud based deployment reduces both CAPEX and OPEX, minimizing your support and maintenance overheads

The screenshot shows the UC Centrex Settings page. The left sidebar contains a navigation menu with options: Accounts, Groups, Conferences, Extensions, Devices, Providers, Phone Numbers, Voice Menu, Rules, Settings (highlighted), and XIMMS Console. The main content area is titled 'Settings' and has two tabs: 'Domain Settings' (selected) and 'Account Settings'. Under 'Domain Settings', the following configuration options are visible:

- Mail to Unknown: default (rejected)
- Mail to All is distributed for: default (Authenticated Domain)
- Client IP Addresses: (empty text box)
- Force SMTP AUTH for: default (nobody)
- Accounts limit: unlimited
- Mailing lists limit: unlimited
- RPOP Accounts limit: unlimited
- Domain Aliases: no aliases
- Domain Main Alias: boxoffice.talktop.com (default)
- Billing: Disabled Enabled
- Use external SIP devices to place calls: Yes No
- Use additional emails: Yes No
- Support Email: (text box with refresh icon)
- Google analytics code: (text box with refresh icon)

At the bottom of the settings area are 'Store' and 'Cancel' buttons.

Benefits for the Small Business:

- **Reduced costs:** Simplified, all in one communication package significantly reduces both CAPEX and OPEX and provides pricing clarity
- **Increased sales:** React quicker to customer requests and orders
- **Increased productivity:** Making more of the people, time and resources you already have
- **Improved competitive position:** Lower overheads and happier customers
- **Improved internal communications:** Easily and quickly respond to business critical emails and queries
- **Simplified systems:** Consolidate complex IT systems into one, powerfully simple solution
- **Mobile synchronization:** Keeps employees effective whether in or out of the office

Exceptional Business Communications

Founded in 1991 CommuniGate Systems is headquartered in Mill Valley, California. The company develops carrier-grade unified communications software for broadband and mobile operators to deliver value-added services as SaaS, or Cloud-based services to the business communities. Over 150 million users across 12,000 companies around the world put their trust in CommuniGate Systems every day, with customers ranging from the largest broadband, wireless and wire-line service providers, to enterprises of all sizes.
